Consulting Services for Manufacturer and Fabricator of Engineering Material Solutions

About Client

Client is a manufacturer and fabricator of engineering material solutions, researching and developing materials that meet the electrical and mechanical requirements of its customer's demanding applications.

Business Benefits

- Quick deployment of resource, helped the client successfully to meet deadlines.
- High quality resource at a reduced cost
- Minimized disruptions to end-users and reduced down-time.
- Document management solution with Search feature helped company save a lot of time and effort

Business Need/Challenges

The client was using SharePoint 2013 as Document Management System (DMS), the volume of business critical data was growing rapidly. All file received as e-mail attachment were saved automatically to file share.

- Collaboration feature within File Share: Multiple users couldn't work simultaneously on document
- Search Functionality: Client was facing issues with searching and finding the documents within File share
- Growing Volumes: Client had issues managing huge volumes and retrieving data, all the while expanding businesses and acquisitions

A senior-level SharePoint developer was required to work on several internal applications and required skills to resolve the existing challenges. Client also faced issues with the overall budget of the project and a needed a cost-effective solution. The selected resources were challenged with minimal ramp-up time, quick learning curve in order to meet immediate deployment requirement.

Solution

E PRO understood client's challenges and proposed to operate on a Staffing Model where SharePoint Consultants with niche skills sets unique to their requirement were identified. E PRO's Robust Candidate Selection and Identification process ensured that the resources were best-fit for the client requirement.

E PRO Identified a SharePoint Consultant, a L4 Level Resource was placed offshore

- **Easy Load Application:** E PRO's Consultant proposed a simple and fast migration solution "Easy Load" to help migrate content from file shares to SharePoint on premise and on-cloud.
- **SharePoint 2016 Migration:** Consultants performed a smooth and cost-effective migration from SharePoint 2013 to 2016 to meet the growing data volume demands and client's business objectives
- **Outlook SharePoint Integration:** Developed a tool that automatically captures e-mail attachments, classifies them based on types and were able utilize SharePoint's document search and retrieval capabilities to the potential
