PhiFIX Engine can be easily Integrated to any trading platform which helps Organization to increase their Stability and handle high trading volumes. PhiFIX Engine consists of FIX repository and it also supports Protocol Customization’s (fields, groups, components, enum) and dialect file maintenance. Our FIX Engine ensures that there is no link failure between the messaging workflow and helps users to be connected throughout the trading durations.

PhiFIX has the ability to recover the lost messages from the original session in accordance with the FIX state model. PhiFIX Engine can add huge benefit to every market participant such as Buy Side, Sell Side, Venues and Intermediaries by eradicating complex trading Scenarios and increasing agility in trading.
