

Monitor FIX messages Real-Time & avert any trade risk with PhiFIX Monitoring Suite

Improve your trade efficiency with FIX Message real-time validation. Monitor the daily transactions and identify the risk before it's too late.

PhiFIX Monitor Suite: Averting risk & enabling efficiency

PhiFIX Monitor Suite (PMS) is a multi-protocol suite, to continuously monitor the client and server logs across multiple trading environments. PMS can view the connection status, client details and messages with pre-defined alerts and notification.

PMS has been precisely designed for market participants to provide a transparent view of trading environment. Through various configurations, it allows the administrators to analyze the trading activity and performance across multiple trading platform. It provides accurate statistics and transaction details for specific log and thus results in control over their trading operations.
