

Delivering Seamless Trading on
Enterprise-Level with Sensiple's suite of
FIX Protocol Products

A comprehensive suite of products
for all your FIX-Technology needs

What We Offer

Trade seamlessly with electronic trading communication for all market participants (Buy-side/Sell-side/Venues etc). Sensiple's PhiFIX is a suite of multi-protocol (FIX Protocol, FAST, ITCH & OUCH) based messaging infrastructure to streamline high performance electronic trading communication in the financial securities industry. It implements the automated trading of multi-assets including securities, derivative, and other financial instruments.

Our Suite of FIX Protocol Products:

PhiFIX suite of products spans across electronic trading life cycle including FIX Messaging Engine, FIX Session Testing, FIX Session Monitoring, FIX Client Certification and FIX Simulation.

Order Management System:

PhInOMS enables firms to capture and manage all order flows whether manually entered or received electronically. This SaaS-based model offers integrations, software hosted in a private cloud / deployed as standalone, data and FIX connectivity. Seamless upgrades and 24/7 support are provided.

Why choose PhiFIX

- ✓ Best Implementation Practices
- ✓ Ease of Operability
- ✓ Supports Trading Automation
- ✓ Best-in Class Infrastructure
- ✓ Secured Framework

PhiFIX- Our Suite of **FIX Protocol Products**

This suite influences increased connectivity, operational efficiency, and low latency in the trading platform. The differentiator of PhiFIX is, it is comprehensive, robust, scalable FIX connectivity solution, which supports FIX functionalities in pre-trade, trade and post-trade, FIX Protocol message formats and various order routing systems.

Accelerate Trading with Low Latency PhiFIX Engine

Designed for high-frequency trading and to overcome connectivity latency issues. Supports multi-session and all major FIX versions. Low integration cost which involves FIX dialects customization for exchanges.

Automating FIX client Onboarding with PhiFIX Certifier

End-to-end automation of onboarding & certification of new market participants, venues or asset class. This helps in reducing your operational cost & faster GO LIVES.

Simulating Multi-Trade Scenarios through PhiFIX Simulator

Simulate multiple trade scenarios, APIs, Market Data and replay market scenarios with various trading rules.

Automating Trade Infrastructure Testing with PhiFIX Test Suite

PhiFIX enables testing automation for various FIX functional systems, providing features like complex scenario validation for all market participants.

Monitor Real-Time Trade & Avert Trade Risk with PhiFIX Surveillance

FIX surveillance platform for monitoring trade risk & identify FIX connectivity issues in complex FIX infrastructures with real-time analytics & statistics.

Submit your Trade Reports on Real-Time with TRCapture:

Comprehensive trade capture solution, enables market participants to submit trade reports on real-time with ARM's, APA's & Regulatory Bodies.

Other protocol-based product:

PhiSWIFT

Robust SWIFT solution that supports multiple message types including Payments, Treasury, Security Settlements. It also provides the ability to validate the message structure & format as well as real time integration with OFAC/GI for AML Validations
